**Abstract**—This paper analyzes the problem of college students joining the Party, the issue of joining the Party activists, and the lack of ideals and beliefs at a higher level. It is proposed how the party branch can effectively guide the students in the school effectively, strengthen the study of theoretical knowledge, familiarize themselves with the party at a deep level, and understand the party's solutions.

**Keywords**—New Era; University student; Joining the Party; analysis; Solve

## I. INTRODUCTION

On April 30th, the 100th anniversary of the May Fourth Movement was held in Beijing Great Hall of the People. General Secretary Xi Jinping's important speech at the 100th anniversary of the May Fourth Movement, Explain profoundly the historical significance and the value of the times of the May Fourth Movement. For us to relive the passionate years of 100 years ago, we have better promoted the spirit of the May Fourth Movement, inspired the revival power, and provided a guide to thinking and action.

Youth ideals, youthful vitality, and youthful struggle are the vitality of the Chinese spirit and Chinese power. General Secretary Xi Jinping pointed out that youth is the most active and energetic force in the entire social force. The hope of the country is in the youth of the youth and the nation. In the new era, the Chinese youth are at the best stage of the development of the Chinese nation, and they are faced with the mission of the times when the heavens will be reduced to the people. In the new era, Chinese youth should inherit and carry forward the spirit of the May Fourth Movement, fulfill the great rejuvenation of the Chinese nation, live up to the expectations of the party, the expectations of the people, the trust of the nation, and live up to our great era [1].

The youth is prosperous and the country is strong. Youth is a new force in the new era. When we enter the university, it is our best time to pursue knowledge, and our life level and pattern will be greatly improved at this stage. As students, we don't have much contact with the society, but in the youth

campus, there are also many places worthy of attention, such as college students joining the party?

## II. IGNORANCE OF THE PARTY'S CONFUSION

When we were young, we tied a red scarf, wore the Young Pioneer badge, and joined the Communist Youth League. Being educated from an early age to support the leadership of the Communist Party of China, Until now, We have very little understanding of the Chinese Communist Party. I only know that the Chinese Communist Party is the vanguard of the Chinese working class. At the same time, it is the vanguard of the Chinese people and the Chinese nation, and is the core of leadership for the cause of socialism with Chinese characteristics. Representing the development requirements of China's advanced productive forces, Representing the direction of China's advanced culture, Representing the fundamental interests of the Chinese people [2]. Our understanding of the party is still only at the basic level. We have never understood the deeper things of the party. So much so that when I talk about the Chinese Communist Party, I only know that without the Communist Party, there would be no new China. For the party's construction, development process, basic system, and the basic principles of construction, We can say that it is a half-baked solution. We are confused about the party, Because the party created our beautiful life now, we can feel it physically, But the heart feels that the party is far away from us, the feeling of being incomprehensible and unclear.

## III. PROBLEMS IN THE ACTIVE ELEMENTS OF COLLEGE STUDENTS JOINING THE PARTY

### A. Problems in motivation of joining the Party

In the last century, going to college can be said to be a squid, which will change the fate of a person and may even affect the fate of a family. However, nowadays, the popularity of compulsory education and the improvement of education level have increased the proportion of college students nationwide. It is no exaggeration to say that the streets are full of college students. This is undoubtedly a pressure on college students. Only by continuing to study further can it be possible to find a good job in society in the future. In such a competitive

society, joining the party will facilitate you to find an ideal job in the future. The current society pursues material interests, pays more and more attention to its own state and actual interests, drives people to be more realistic, pursues material, and is no longer enthusiastic about the pursuit of spiritual level.

#### *B. Attitude to join the Party*

Among the graduate students of college students, the number of people who actively ask for membership has suddenly increased. But some students did not really realize the significance of joining the party. Many college students join the party for psychological satisfaction, blindly obedient, others ask to join the party, they must apply, they can not fall behind others. But I don't know what I want to do when I join the party. There is also the request of the parents. At the parents' suggestion, they submitted the application for joining the party [3]. Some parents lacked the understanding of the party. They only knew that joining the party would help their children in the future and actively encourage their children to join the party.

#### *C. Lack of ideals and beliefs*

The ideal belief reflects the value pursuit of a political party. Provides a powerful spiritual drive. Modern college students lack the pursuit of ideals and beliefs. The lack of ideals and beliefs can lead to confusion and triviality. Under the dual stimulation of modern technology and economy, college students have gradually become slaves of matter. Live broadcast platforms and e-sports games have flourished in recent years. Many college students also want to become famous overnight, get rich overnight, enjoy the material, and gradually lose themselves in the chase of money. When I was a child, my ideals and the future of the future have been thrown into the clouds. Showing the youth's vitality seems to be dead, not strong, but just want to take shortcuts [4].

### IV. THE CORRECT GUIDANCE AND EDUCATION OF THE PARTY BRANCH

#### *A. Implementation of ideological education*

Faith is actually a person's ideological understanding. Through the news media, contemporary college students are familiar with the stories of one advanced party member and admire and admire him from the inside. Therefore, they have a certain understanding of this group of party members and gradually sublimate into the belief of the party. When the fog is gone, the road you walk through will be clear. If you don't leave, no matter whether the fog is scattered or lost. It is very important to eliminate confusion. It is the need for college students to maintain a healthy psychology. They must take the initiative and serve the society as the core of their personality. With this as the center, we will unite our own needs, aspirations, goals and behaviors, establish a lofty ideal, and thus generate a strong internal drive, promote self-study, and become the pillar of society[5]. The new era is full of enthusiasm, and youth is constantly fighting. General Secretary Xi Jinping pointed out in the article "Several Issues on Persistence and Development of Socialism with Chinese Characteristics" For the Marxist beliefs, the belief in socialism and communism is the political soul of the Chinese Communists and the spiritual pillar of the Communists to

withstand any test. "The Party branch should strengthen students' study of the party's basic knowledge, strengthen their understanding of the party, and establish an ideal pursuit of communism [6].

#### *1) Strengthen the understanding of the Party*

To treat history correctly is to be good at learning from the history of the party and gaining wisdom and strength from it. Only by having a deep understanding of the party's struggle yesterday can we do all the work today and bravely assume the historical responsibility of tomorrow. As a college student of a new era, he has submitted an application for joining the party and became a party activist. It is better to learn and study the history of the party, Constantly reinforce the lofty communist convictions, hone strong will, strengthen the sense of responsibility of the times, inherit and carry forward the glorious tradition of our party, and carry forward the Marxist style of study linking theory with practice. In other words, only understand the history of the party and the historical significance of the party, constantly improve the understanding of the wrong party history of college students, and promote the healthy and harmonious development of society. College students are the future of the motherland and the hope of the nation. It is a very important thing to educate college students with what kind of history. We must actively promote the party history education into the school, enter the classroom, enter the students' minds, cultivate morality, and cultivate them to establish a correct world outlook, outlook on life and values through the development of colorful missions and the unique role of modern media such as the Internet [7].

#### *2) A firm belief in communism*

The belief in communism is the true belief in the ideals of communism and the cause of communism. Convinced the theory and principles of communism and the belief that the cause of communism must win. The communist conviction is a concentrated expression of the firm belief in communism, deep feelings, and strong will to fight for communist ideals. As the most valuable psychological quality and inner spiritual power of the proletarian revolutionaries, communist beliefs are distinctive features of science, principle and firmness. Xi Jinping pointed out at the celebration of the 95th anniversary of the founding of the Communist Party of China: In theory, it is clear-headed and politically firm. A firm ideal and belief must be based on a deep understanding of Marxism and based on a deep grasp of historical laws.[8] The whole party should thoroughly study Marxism-Leninism, Mao Zedong Thought, Deng Xiaoping Theory, the important thinking of the "Three Represents", and the scientific development concept, and thoroughly study the new ideas, new ideas and new strategies of the Party Central Government since the 18th National Party Congress, and continuously improve Marx. The level of ideological consciousness and theory maintains a clear understanding and persistent pursuit of lofty ideals and goals. We must continue to strengthen the party-level knowledge education for college students, especially college students, party members, development targets, and party members. Through the practice and propaganda and education to mobilize the enthusiasm of college students, establish avant-garde model consciousness, cultivate a simple proletarian

sentiment, strengthen the great ideal of communism, bear in mind the oath, not forget the mission [9].

The firm communist conviction is the spiritual pillar of people's soul, the foundation of morality, the strong cohesiveness and spiritual motivation, the concentrated expression of the advanced nature of the Communists, the firmness of politics, and the high degree of consciousness. Therefore, we must establish firmness. The ideals and beliefs of communism, pioneering and innovating, and bravely marching forward, in the course of future practice. Only with firm conviction can we maintain the vitality and vitality of the Communist Party and continue to build a socialist cause with Chinese characteristics!

### 3) *Establish a correct outlook on life*

The outlook on life is the spiritual pillar of a person and has a decisive influence on people's life, ideology and morality, ideology, and political views. A correct outlook on life can guide the correct direction of life and create a life value that benefits society. The wrong outlook on life makes people go on the wrong path and ruin their lives. College students are in an important period of transformation of their outlook on life. They are relatively malleable. Whether they can guide students and establish a correct outlook on life through guidance and education will determine the path of life for college students. When college students are in school, it is the best time to learn professional knowledge and learn how to behave. As a frontier group of new social era, new ideas and new technologies, college students cultivate high-quality talents. Only by letting college students establish a correct outlook on life can we curb the influence of various misconceptions, distinguish between right and wrong, good and evil, beauty and ugliness, guide college students to follow the path of life, use their own labor to create life achievements, and become a benefit to society. a noble person of the people; Only then can life always develop in the right direction of life, can correct its own attitude towards life, face life with a positive attitude, full of enthusiasm and hope, love life, cherish life, bravely and strongly overcome all kinds of hardships in destiny. , constantly achieving new heights in life. Therefore, we must adopt various forms to guide and educate them on the correct outlook on life, educate them with the basic Marxist theory and the socialist core value system, and guide them to establish a correct outlook on life [10]. To this end, educating college students on a correct outlook on life is not only related to the healthy growth of the younger generation, but also to the prosperity of the country.

### *B. Strengthening the Party Organization Construction*

In the construction of grassroots party organizations, the activities of party branches must be colorful, flexible and diverse. A variety of meaningful thematic activities can be carried out. In construction, we must not only stay in theory, but also implement it in practice. Only through concrete practice can we truly understand theoretical knowledge [11]. You can watch some film and television materials, hold tea parties and exchange meetings on weekends, let students keep positive and progressive, pursue progress, adhere to diligence and study, and pursue the truth. The party branch must truly

implement the activities and conduct of various activities, and must not only be rigid in form, but not concrete.

### *C. Leading representatives of model*

The young generation's historical mission needs to inherit and carry forward the spirit of the May Fourth Movement. One hundred years ago, the May Fourth Movement took the youth as a pioneer. Today, the national rejuvenation is realized. The younger generation also has to take on the historical mission and become a new force. A good role model can play an exemplary role, driving a style and leading the society. Qingdao's "bent-shoulder girl" Zhang Yumin gave the old man a shoelace moment, which made countless people warm their hearts. In that moment, they were kind and gentle, and they swayed people's hearts.

## V. CONCLUSION

Mr. Li Dazhao screamed: "Everyone is excited by the spirit of youth, and the dawn of the new Chinese youth should be made." A hundred years later, the Chinese youth of the new era solemnly swear: "Long live youth, strong country has me." Take the wind and go, look at the mountains and rivers. The younger generation set up a lofty ideal, continued to struggle, and kept the battlefield innocent and youthful. To fulfill the responsibility of fulfilling the Chinese dream.
