Keywords: social sports guidance and management; undergraduate specialty; training requirement; course system; core course

Abstract. Course system refers to different courses in the same specialty are arranged according to the order of the categories, determines students how to acquire the knowledge structure through the study. This paper studied the existing problems of the course system construction for undergraduate specialty of social sports guidance and management. Firstly, research the training requirements, build professional ability structure training model of social sports guidance and management; then, study course system, build undergraduate specialty course architecture of social sports guidance and management; finally, the core course description, including sports management, sports physiology, introduction to social sports, theory and methods of physical exercise, sports economics, and so on. The research results of this paper plays an important role for improving the quality of training and meeting the needs of the society.

Introduction
Social sports professional students mainly study the basic theory and basic knowledge of the social sports, get the basic training from social sports work, to grasp the basic ability of the mass sports activities organization management, consulting guidance, management development and teaching research and so on. Sport is sport in people's life, it is a kind of people's way of life, along with the increase of public health awareness and demand, as well as the development of sports industry, and mainly to cultivate the PE teachers, its physical education major has been unable to meet the needs of the social sports diverse talents [1]. Therefore, in order to foster a fitness guide and sports industry management personnel consisting mainly of social sports specialty emerged. Social sports guidance and management program aims at training students with sports theory, theory of education, humanities and social sciences and the basics of economic management, with the scientific concept of leisure sports and market development awareness, able to grasp the rules of leisure sports activities and insight into sports leisure market changes, in leisure sports activities, effectively engaged in the promotion, guidance, management and planning, effectively carry out product planning, design and development, and to organize various leisure sports talent.

Course system refers to different courses in the same specialty are arranged according to the order of the categories, is the sum of the content and process of teaching, the order of course categories arrangement determines the students will gain what kind of knowledge structure by learning. Course system is the guiding ideology of educational activity, is the specific and support of training goal, it provides for the planning program of the implementation of the training objectives. Course system is mainly composed by a specific course concept, course objectives, course content, course structure and course activities, which play a dominate role in course concept [2]. According to the existing problems of social sports guidance and management undergraduate specialty course system construction, and professional ability structure training model of social sports guidance and management, to built on the scientific courses sports, for foster social sports guidance and management professional talents service.

Training Requirement
earning basic theoretical knowledge of social sports guidance and management, master the basic
skills of social sports guidance and management, basic theory and basic knowledge, receive basic training about sports specialty skill and sociology and histology, management and other aspects, with the masses sports activities organization and management, technical guidance, business development, propaganda and reporting capabilities. The graduates should acquire the following knowledge and abilities: grasp the basic principles of Marxism, Mao Zedong thought, Deng Xiaoping theory, the important thought of "three represents" and the scientific concept of development, have a solid foundation of natural science knowledge and the specialty required technology base and professional knowledge; to understand the social sports guidance and management and the dynamics and trends of industrial development; grasp the basic knowledge of sports industry management, fitness instruction, health rehabilitation guidance and other aspects, basic techniques and basic skills; Having the ability about independent acquire the professional knowledge, update knowledge and apply knowledge, having the ability to independently analyze and solve practical problems in the professional field, to carry out scientific research and sports science and technology development; basic master a foreign language, can read professional foreign language books, general session; have the basic skills to use computers; with more strong adaptability, affordability and interpersonal skills, physical health, mental state is good. The above training requirements summarized as the ability to structure training model, as shown in table 1.

Course System

Social sports guidance and management in the past practice of running school has achieved fruitful results, but many failings exist in the curriculum sports construction, mainly in following areas [3]:

(1) The course structural imbalance. The course structure is the organization form which is in accordance with the rules between the various types, the various elements and the various components of the internal course. Course structure mainly solves the coordination problems between the various parts of the course content Professional courses and basic courses and elective courses and required courses, the proportion of some imbalance, the relative lack of professional basic courses classes, attention degree is not enough, is not conducive to the students to master the systematic and solid theoretical foundation of professional knowledge and skills.

(2) The course setting is not reasonable. Course setting is the establishment and arrangement of the various types of schools selected courses, including the open course, the order of the course and the arrangement of the contents. Some courses have no direct contact with the professional training
direction, which makes some students have vague position in the direction of professional training, some of the practical application of the theoretical courses is not strong, should be effective trade-offs;

(3) Professional practice teaching system is weak. Social sports guidance and management specialty is a practical and applied strong professional, to students' practical skills have higher requirement, such as management skills, marketing skills, fitness guide skills, interpersonal skills, good image and temperament cultivation and other practical ability. On the one hand, the lack of a relatively stable practice base outside school professional practice, seriously affecting the quality of teaching practice. On the other hand, the organization form and content of the specialized course practice is single, the practice teaching is more difficult to operate.

For the current existing problems of social sports guidance and management course system construction, should take the social demand as the guidance, based on the practice of running schools, updated ideas, reasonable positioning, strengthen management. Making course system construction should follow the following principles: optimize course structure and course setting to meet the needs of society; actively establish school-enterprise cooperation practice base, and enhance the professional educational strength; to improve school conditions, strengthen teaching management, to provide protection for the optimization of course system [4-6]. This paper constructs social sports guidance and management course system is shown in Fig. 1.

Core Course

The core courses of the social sports guidance and management specialty briefly described as follows:

(1) Sports management. Use management theory and methods, to research the coordination of sports organizations in order to achieve a predetermined sports targets discipline. Since the management system mainly consists of three aspects: the management, the management objects and the management means, so its research objects include managers and as managers financial, material, time, information, and manage forms and methods. Contents include: the basic principle of sports management; the development history of sport management; sports management system; functions of sport management; sports management processes and methods; the management form and method of all kinds of sports. In practical applications, often used in the field classification method, namely school sports management, competitive sports management, and the masses sports management, and so on. Research methods include observation, investigation, experiment, comparison, analysis and case studies.

(2) Exercise physiology. So that students master the basic theory and basic knowledge of exercise physiology, and through the experimental class and social practice, to develop students' ability to find problems, analyze problems and solve problems. To enable students to apply basic theory and method of the exercise physiology, guide and evaluate physical education, sports training, and physical exercise, and basic methods of assessing human body functions primarily preliminary master. Through classroom instruction and experiments to understand the phenomenon of the normal physiological activity, the laws and regulatory mechanisms, to master the basic theory and basic knowledge; grasp the impact of the various systems and organ function of the body and the basic mechanisms of physical activity; master the physiology principles of physical exercise and extracurricular sports training and the physiology evaluation of exercise effect, guiding physical education, sports training practice and fitness activity.

(3) Introduction to social sports. From different aspects, elaborated the knowledge of social sports, competitive sports and market rules other aspects, for students to understand the cultural values of sport, social connotation, market value, market operations and the improvement of appreciation level of sports beauty and sports photography capability has a good ability guidance. Teaching tasks are as follows: the explicit task of the purpose of social sports, systematically master the basic principles, rules and methods, to understand the full development of sports psychology dynamics, characteristics and trends; clearly know the responsibilities of coaches and coaches should have the knowledge structure and the ability structure, solid establish professional thinking,
loyal to the party's sports career, to be a qualified coach; the actual use of the operating capacity of the various methods of social sports organization, and in accordance with the basic requirements of the plan formulation, to lay a foundation for the future in the professional work.

(4) The theory and method of fitness movement. Through teaching practice, students understand the method and evaluation of fitness training, the structure and composition of the

---

**Course system on undergraduate specialty of social sports guidance and management**

**Based general**
- College foreign language, ideological and moral cultivation and legal basis, the outline of Chinese modern history, the basic principle of Marxism, Mao Zedong theory and the theory system of socialism with Chinese characteristics, the situation and policy, college students' psychological health, military theory and training, career planning, career guidance

**Artistic quality**
- Art appreciation, film and television appreciation, dance appreciation, music appreciation, calligraphy appreciation, theater appreciation, opera Appreciation art introduction

**General development**
- Popular cultural studies, university history, Chinese history of science and technology, introduction to Chinese culture, ethics, public relations and communication, introduction to Chinese traditional culture, philosophy of science, investment management, management operational research, contemporary international politics, Chinese history and cultural heritage, fundamentals of computer application

**Professional foundation**
- Sports anatomy, sports physiology, exercise psychology, physical measurement and evaluation, physical rehabilitation science, sports science research methods

**Professional core**
- Introduction to social sports, sports management, the introduction of community sports, sports club management, health evaluation and exercise prescription, health body fitness

**Motor skills**
- Tennis, volleyball, basketball, table tennis, aerobics, badminton, basic gymnastics, taekwondo, football, tai chi, swimming

**Professional direction**
- Social sports management, introduction to social sports organization and management, sociology, social sports instructor introduction, sports event planning and management

**Fitness guidance**
- Theory and methods fitness, sports nutrition, fitness equipment, first aid and prevention of sports injuries, fashion aerobic fitness dance

**Recreational sports**
- Sports and leisure theory, billiards, lawn bowls, sports or leisure theory and practice, bocce, yoga, hip-hop, skating

**Basic expand**
- Sports tourism, sports agent, sports marketing case, sports prescription, physical training, yoga, communication theory, Mandarin, sports nutrition

**Outdoor training**
- Directional cross-country, expand training, outdoor survival, introduction of outdoor instructor, basic mountaineering skills, emergency treatment of emergency incidents, mountain outdoor sports

**Practical ability**
- Innovation ability, knowing and evaluation, outside school practice of ideological and political theory, graduation practice, graduation thesis, professional practice, and professional major capacity evaluation

Fig. 1. Course system on undergraduate specialty of social sports guidance and management
fitness activities, and mainly introduce the fitness method of the health problems. The purpose is to
make students master the methods and evaluation of building a comprehensive and systematic
fitness training, master fitness activities structures, methods and means; and to understand the
specific methods and ways of promoting and improving the health level. To train the ability of
sports specialty in a comprehensive, systematic teaching fitness approach. Through teaching
practice, the students can systematically master the basic knowledge, basic techniques and basic
skills of fitness, initially to achieve "speaks, will do, will guide".

(5) Sports economics. It is an integral part of modern economics, which is the product of the
combination of physical education and economics. A comprehensive and systematic study of the
relationship between sports and the economy; and to study the sports how affected by economic
constraints, but also how to promote economic development; explore the rules and characteristics of
the sports industry production, exchange, distribution, and consumption, as well as the nature,
characteristics and development law discipline of the economic phenomenon, the process of
economic activity in the field of sport.

Conclusion

The course system will be the permutations and combination of the various constituent elements of
the course, so that all the course elements in the dynamic process unified point to the system that
the course system goal to achieve, it is to achieve the carrier of the goal, is the key to ensure and
improve the quality of education. With the increasing of the social economic development, the
rising of people's living standard, the increasing of leisure time, people pay more and more attention
to their own physical and mental health, so as to promote the vigorous development of the national
fitness activities. The demand of the society to the multi-level and diversified social sports talents is
increasing rapidly, while the overall quality of social sports talent also made newer and higher
requirements. This paper constructs the social sports guidance and management professional course
system, for improving the quality of training, to meet the social needs, has an important role.
