Keywords: The Cooperative Construction of the Party and the Youth League, Party Branch, Student Society.

Abstract. The cause of mass organizations and youth groups is an important part of the party's cause, strengthening the party committee's organizational lead for the work of mass organizations and youth groups is an important content of strengthening and improving the work of the party's mass organizations and youth groups in the new era and the new situation. In this paper, taking creation and practice of the student party branch in school of materials science and engineering of Wuhan University of Technology as an example, on the basis of the student community organization, we established the party branch to carry the joint construction of the party and the youth league, and researched the theoretical system, constructing principle, support content, and operation mode of the party and the youth league cooperation in colleges and universities, so as to provide useful experience for further enhancing students' basic party in colleges and universities.

The Significance of the Party and Youth League Cooperation

The Party and Youth League Cooperation is the Objective Requirement of Training New Era Generation

“‘The opinions of the CPC central committee on strengthening and improving the work of the party's mass organizations” clearly point out that “the development path of the mass organizations of Chinese characteristics socialism is the only way for the mass organizations to keep pace with the times and to grow stronger. Those strengthening the party committee's organizational lead for the work of the mass organizations, promoting the reform and innovation of the mass organizations and enhancing their vitality are important contents of strengthening and improving the mass organizations work of the party under the new situation. According to the report of the 18th national congress of the communist party of China (CPC), party committees should be strengthened in organizing and leading the work of mass organizations and youth groups, improve the system and mechanism of leading mass organizations in party building, and make leading mass organizations an important part of the responsibility system for party building [1].

The cause of the communist youth league is an important part of the party's cause, the youth mass foundation for the party's governance and the future of the party and the country. Since the 18th national congress of the communist party of China (CPC), the CPC central committee taking comrade XI Jinping as the core has attached great importance to the work of the communist youth league (cyl), made solid progress in the reform of the cyl, strengthened ideological guidance, served the needs of the youth, strengthened organizational vitality, and cultivated batch after batch of new youth to shoulder the great responsibility of national rejuvenation.
Party and Youth League Cooperation is the Realistic Need to Stimulate the Organization Vitality

Under the new situation and environment, party building in colleges and universities faces new opportunities and challenges. First, the development standard of party members is single: most colleges and universities adopt the credit system as the basis for the reform of teaching management mode in colleges and universities. The main assessment standard is the development of individual learning achievement, instead whether the development object has the basic political literacy such as "four consciousness". Second, the foundation of the masses is not solid: under the credit system reform, the common phenomenon of students in different classes is not conducive to the comprehensive test of students' daily performance, ignoring the investigation of students' quality cultivation in the important events and at critical moments and also ignoring their actual performance in the second class, so the foundation of the masses is weak, and they are not representative [2]. Third, the lack of student community vitality: dedication of students in the community do not serve as aspect of evaluation, which is not conducive to cultivate a group of student leader and college youth needed for new era in colleges and universities. The above problems make the current construction of student party and league organization deviate from the actual needs of college students to some extent and weaken the role of student party and league organization as a battle fort.

Accordingly, the guidance and help of party organization appear particularly important. The communist youth league of colleges and universities should adapt to the new changes and new characteristics of the times, the society and the youth should be realistic and pragmatic, keep pace with the times, and insist on reform and innovation. The youth league committee takes youth league members as the center, associates mass organizations as the link, and uses colorful extracurricular activities as the approach, the work of the mission not only meets the growing needs of the school, but also constantly adapts to the changes and development of young league members under the new situation. The party building leads the youth league building and the youth league building promotes the party building, so as to it can achieve a win-win situation.

Party and League Cooperation is An Important Carrier for Students to Grow into Talents

"Party building with the league building" is an important content of the theory and practice of party building in the new era [3]. Party building leads the league building, moves the center of gravity downward, and is close to the student group, which plays an important role in the growth of students.

**Full Play a Center Role of Thought Construction**

With the aid of the party branch in colleges and universities going into the league branch, the advantages of theory and practice of the party branch cab be used to guide the daily life and social practice of youth league branch, guide the youth to build a solemn spirit building in the heart, become the participants and the practitioners building socialist core value system, and absorb into their own values, sets up the process of synchronization in time, accord with the ideal faith of trajectory.

**Full Play the Basic Function of Organization Construction**

By strengthening grass-roots organization, the students party members, cadres and youth students together can share theory study and theme resource platform, which makes the leading role of party organization and linking role of youth league organizations closely combine together, provides sufficient nutrients to better serve for the growing youth.

**Full Play the Important Platform of Cultural Construction**

We should carry out multi-level and multi-category cultural activities that meet the needs of youths themselves and the campus characteristics of colleges and universities. On the one hand, with the help of college students' union, student associations and other student self-governing
organizations, by using the practical activities of "promoting action by knowledge and seeking knowledge by action", we run through the socialist core values and guide young people to set up the correct three views; On the other hand, we should pay attention to youth vitality, build an important platform for young students to exercise their skills and improve their quality, integrate new ideas and vitality into mainstream values, arouse value resonance, and provide a driving force for cultural development in the new era.

**Full play to the important guarantee of system construction**

We should clarify standard constitutions, make the party and league organizations of students have basis in work and life, ensure their normal operation, enhance the cohesion and honor sense of the organization, and realize the coordinated development and common progress between individuals and organizations.

**Explore the Mode of Party and League Cooperation**

“The opinions of the CPC central committee on strengthening and improving the work of the party's mass organizations and youth groups” point out that the cause of mass organizations and youth groups is an important part of the party's cause, which shows the importance and urgency of strengthening and improving the work of the party's mass organizations and youth groups in the new era. Under this background, colleges and universities are going to explore a new model of student party and league cooperation [4].

**Organizations Build**

To better grasp the properties of the branch built in the community and branch depends on the community, highlight community cadre's ability promotion and dedication, the party branch should combine closely with the community, make a practical problems that is the community cadres have strong fluidity cover into branch advantage such as students with high qualification, inspection appraisal, and development object being strong impartiality. We formulate the practical rules and regulations and evaluation methods combining club activities and party branch activities, design and develop group activity to ensure the thought depth and covering breadth, combine daily examination and transaction management, develop and improve the responsibility system in order to ensure combination with the branch and personal work. In this way, a new cooperative mode of party branch and mass organization co-construction, co-integration of branch life and community activities, and co-consultation of evaluation and work assessment is built.

**Party Member Development**

Abide by the relevant rules of the communist party of China, according to the process of “recommending excellent league members into the party-determining activists - inspecting activists-determining development object-inspecting object-determining probationary party member- formal party member”, branch secretary for the principal leads inspecting team organization to investigate the probationary party member and submit the proposed development to higher party organization. Considering the mobility problem of student cadres, it can be solved in the following two ways: if the student is developed into a party member within the branch, but he/she does not continue to hold office in the affiliated society, it still belongs to the management and assessment of the party branch of the society; If it is not developed into a party member within the branch, it will flow to the party branch of the grade in which it belongs, and complete the transfer of organizational relations and personal files.

**The Operation Mode**

Development of party branch thoughts lead, theoretical study and practice activities should take branch as the center, grasp branch characteristics and advantages, unite all kinds of group organizations, bring new ideas, new spirit, and new deed into the branch. Firstly, we will strengthen institutional norms and guide the building of grass-roots youth league branches. The second is to
focus on ideological guidance and guide student association’s work. Thirdly, set a good example, guide young students to grow into talents.

**Effect Evaluation**

The effectiveness of branch construction is whether plays full the role of combat fort or not. The second is to see whether the development of branch members can play an exemplary role. Thirdly, it is necessary to see whether the branch can take the lead in giving play to the active role of “promoting league building” and be recognized by the student group. The branch has the vitality, the branch activity dependent develops, the result is remarkable, only when the branch member has the sense of belonging, and the general youth has the centripetal force. The above is the main way to test the actual results and implementation results of the joint construction of the party and the youth league in colleges and universities.

**Experience and Inspiration**

**Adhere to Taking the Cultivating Socialist Core Values as the Core**

Socialist core values are the soul of cultural soft power and the core of cultural soft power construction. As the vanguard of inheriting and creating advanced culture, the party and the youth league of colleges and universities should not only build this battle fort jointly by the party and the youth league, but also include the cultivation of core values into the improvement of organizational vitality, and play a key role in strengthening the construction of the party organization and promoting the development of the youth league organization in the new era. This requires the party committees of colleges and universities to adhere to the socialist core value system, strengthen education guidance and institutional guarantee, take it as an important source of leading the cultural construction, and ideological and political education work of colleges and universities, promote the value orientation of the co-construction of the party and the youth league for college students, and cultivate new people with ideals, abilities and responsibilities.

**Adhere to Improve the Vitality of Student Party and League Organizations**

Under the new situation and environment, colleges and universities are generally faced with problems and challenges such as single standard for party member development, unstable mass foundation and insufficient vitality of student associations. Therefore, sorting out the differences and connections between "what is the youth need" and "the joint goal of the party and the youth league", grasping the biggest common ground and grasping the key issues are the primary tasks. And this also requires us to always take the new changes and new characteristics of the youth as an important research topic. The joint construction of the party and the youth league should conform to the thoughts of the youth, focus on the needs of the youth, and guide their actions, so that it cannot only meet the needs of the growing campus culture of colleges and universities, but also build a battle fort for the organization and construction of the student party and the youth league.

**Adhere to the Guidance of Meeting the Needs of Students to Grow into Talents**

"Party building with the league building" is an important content of the theory and practice of party building in the new era. It is also an important methodology for the organization of the party and the league to shift its center of gravity to help students grow into talents. Therefore, the party and league organizations should grasp the ideological construction and guide the youth to establish the ideal and faith that is synchronized with the progress of the times and in line with the development track. We should strengthen the construction of organizations and provide a platform for sharing resources for theoretical learning and practical activities of young people; construct the campus culture, let the youth vigor manifest in the campus characteristic activity, set up the correct three views, promotes the individual ability. We should attach importance to institutional guarantee and ensure that the youth themselves and the party and youth league organizations develop and make progress together.
