I. INTRODUCTION

According to Ralph Dahrendorf social life have never quit from conflict. If not be managed better, that conflict will always accompany even can destroy principal life of political social group and can bother peaceful, peace and order atmosphere. Sir Paul Vinogradoff in his book Common Sense in Law (1959) stated that one of non sens things if social relation can take place better, while society alone don’t know about order, safety, justice, etc.

Political conflict caused by important collision which placing forward culture and religion symbols which bring big influence of political social impact to security. This matter seems realized by power since colonial era. The symbol if not be managed truly, can be exploited to various importance in order to divide state. Zoon Politicon and in English referred as man is by nature a political animal; aristocrates mean that politics represent reality existence of human being in societal life. If two people or more have interaction each other (in experiencing life in world), hence they not get out of involvement in relation having the character of politics.¹

Social conflict (and also political conflict) represent phenomenon which have influence in making decision. More excitement conflict, more difficult to make decision which obligatory all of them.² Opponent and conflict are consensus. Consensus which referred as agreement or general consensus which occurred when all party have same opinion. Therefore, conflict occurred when there no consensus, and consensus happened when conflict have pacified.

Some fundamental problems are :
1. How POLRI’s efforts and conduct in solving conflict between political party supporter
2. Do role reorientation conduct have in line with law mechanism which have been specified formulated as follows :
a. To understand and explain conducts and efforts which have done by POLRI in solving each social political conflict which happened in community.
b. To understand and explain role reorientation as background of POLRI’s action in solving conflict between political party supporter according to law mechanism which have specified.

If main purposes in this study can reach, hence will give very important

This study which orderly in socio-legal domain will be designed in some phase, they are : (1) coherent of research tradition, (2) strategy research design and determination of research location, (3) selection of data collecting method, and (5) selection of Analyze method and data interpretation³. ²Maswadi Rauf (UI Professor), Internet, a glance of conflict theory : May 2002; Conflict happened if there are any difference which constituted altogether so that they know there are other party who oppose against their opinion.
II. SOFTWARE DEVELOPMENT METODOLOGY

According to history note, police in real world make a move from militarism understanding embracing to civil understanding, that Movement process earn careful than tendency “brute force” to way of police which “humane policing”.

Friction process like that can perceive from birth of police in English in 1829, which often mentioned over and over as modern police model. Even if in the form of rather harsh, in birth of The Metropolitan Police in English when designing uniform the Metropolitan Police, that is an uniform which was designed to make them look as much like civilians as possible.\(^3\)

Understanding police militarism understanding want police to in running duty and his authority have to have militaristic attitude or having the character of military. English Police Founder Robert Phel afford affirm, that attitude and nature of military discipline remain to stick in each police member, because police represent a state civil organization armed.

Civilization understanding, born police doctrin The Soft Hand of Society. Flabby hand, friendly and soft service to society. Here people and police have the character parallelly so-called community politicing, so that have relation having the character “horizontal” orienting problem solving and partner. Passed duty police here is to give safety, protecting and serving society.

Sample from duty like that for example = assisting to finish dispute between Citizen society construct and security orderliness of society, constructing and security orderliness of Citizen society, looking after safety soul, etc which is ordinary to be referred as Police Hazard (PH) And kriminogin correlative factors ( FKK).

Thereby, in fact role which played by police not only having the character of repressive after existence of factual threat (AF). In reality, Percentage of police work having the character that smaller repressive in comparison with work having the character preventive, and even much more small in comparison with work having the character of preemtif. According to Baley (1998) and article 19 section (2) Regulation No. 2 Year 2002 about POLRI; In executing authority and duty as referred in section (1) POLRI major precaution.

Compared to the amount of central java resident as much 32.114.351 head while amount of POLICE Polda Central Java member more or less as much 32.000 people. Member POLRI ratio with amount of resident besides ideal below the mark Interpol, also felt less proporsional, because not all POLRI member conduct operational duty and relate to society service.\(^5\)

Because of police friction become important to be conducted]. This matter to become relevant along with ratio of POLRI amount member compared to the amount of resident served in Indonesia are 1 : 1000 - 1200 people, ideal though according to PBB are 1: 400 resident.
